Career Vision & Value Proposition

A profile combining BA/Product capability, digital operations, partnership development, and practical technology platform implementation.

Professional Summary

Business Analyst / Product BA with hands-on experience defining, designing, and operating management software platforms. Able to translate real operational problems into workflows, user roles, data fields, dashboards, acceptance criteria, and feasible technology solutions. Strongest domains include SaaS/EdTech, CRM/LMS, marketplace platforms, QR verification, digital operations, and AI-enabled workflow automation.

Business Analysis

- Elicit requirements from stakeholders.
- Analyze AS-IS/TO-BE processes and change impact.
- Write user stories, acceptance criteria, and implementation guidelines.

Product Ownership

- Define MVP scope, feature priorities, and product roadmap.
- Translate operational problems into feasible solutions.
- Track feedback, change requests, and usability improvements.

Digital Operations

- Standardize processes, dashboards, and reports.
- Coordinate digital presence, inquiry flows, and lead paths.
- Connect workflows across business, technical, and user contexts.

Strategic Partnerships

- Connect schools, partners, and communities.
- Design partnership flows and service implementation models.
- Coordinate projects from discovery to launch.

Positioning Statement

This profile presents not only employment experience, but also the ability to build digital products, coordinate stakeholders, and turn operational problems into implementable platforms.

Core Capabilities

Four core capability groups: business analysis, product design, technology alignment, and operations-partnership execution.

Business Analysis & Process Design • Requirement discovery, stakeholder interviews, expectations, and scope. • AS-IS/TO-BE, workflow mapping, user journey, role/permission logic. • Impact analysis, SOPs, and conversion of manual processes into digital workflows.	BA Documentation & Acceptance • User stories, acceptance criteria, and BRD/URD/SRS-oriented documentation. • Test scenarios, SIT/UAT support, acceptance review, and feedback loops. • User training materials, implementation guides, and handover documentation.
Product Design & Product Thinking • Define MVPs, product briefs, wireframe/mockup briefs, and roadmaps. • Prioritize features based on business value, operational risk, and feasibility. • Translate business problems into modules, data fields, and dashboards.	Data, Reporting & Dashboards • Entity and data-field mapping for students, classes, schedules, tuition, QR codes, sellers, and listings. • Operational reporting logic, dashboard requirements, statuses, and alerts. • Basic SQL for BA/reporting and structured data thinking.
Technology Alignment & Tools • Work with developers and technical leads to clarify business logic. • Practical familiarity with React.js, TypeScript, Firebase, and Google Cloud Platform. • Microsoft Entra Verified ID, AI/LLM automation, cloud-native services, and identity/security concepts.	Communication, Training & Stakeholders • Native Vietnamese; professional English communication. • Presentation, partner coordination, user training, and user guidance. • Connect business, operations, content, and technical contributors.
Domain Expertise • Education management, CRM/LMS, SaaS, marketplace, trust commerce. • Public portals, digital content, school partnerships, and service operations. • Business processes, partnership workflows, and digital transformation.	Implementation Approach • Agile/Scrum/Kanban/Waterfall literacy. • Lean operations, process standardization, and continuous improvement. • Problem-first, product-first, release-focused, and risk-aware execution.

Professional Journey

Cross-industry experience across technology, education, market development, premium services, and business operations.

04/2024 - Present Product & Business Analysis Lead | CEO & Co-Founder - IVS JSC

- Apply a problem-first approach to define operational needs, workflows, roles, data models, dashboards, and feasible product scope for SaaS/EdTech platforms.
- Lead product direction for CenterCare, LearningCare, ELearners LMS, Aivy TeacherMatch, ACFMart, QRVerified, DongNaiCity, and IVS Service Hub.
- Translate needs from centers, teachers, students, parents, partners, and internal users into user flows, acceptance criteria, and release priorities.
- Coordinate business, content, operations, and technical contributors to track deliverables, handle change requests, and improve post-launch usability.

10/2023 - Present Digital & Remote Operations Manager - Kha Dock & Homes Construction LLC

- Analyze customer discovery, quotation, consultation booking, and service presentation workflows for a construction/home services business in Florida, USA.
- Build and manage the digital presence of khadock.com and khahome.com; optimize information architecture, SEO structure, inquiry flows, and conversion paths.
- Coordinate Google Business, LinkedIn, and cross-border digital channels to support lead generation and stakeholder communication.

06/2023 - 04/2024 Head of Market Development - AMG International Education JSC

- Established and signed partnerships with nearly 50 schools in Dong Nai within 10 months through needs analysis, decision-maker mapping, service-fit assessment, and partnership workflow design.
- Led the IELTS Station project from market research and operating model design to facility setup, team coordination, and launch execution.
- Coordinated cross-functional teams to ensure timelines, service quality, cost efficiency, and operational readiness for education services.

11/2021 - 04/2023 Business Development & Events Manager - Song Trang Restaurant

- Built a network of 200+ travel partners, optimized booking processes, and developed service packages by segment.
- Supported service delivery for approximately 15,000 guests during a three-month peak season, coordinating operations and experience quality control.

2019 - 2021 Co-Founder - TUK TUK: Tea - Pizza & Beer

- Co-founded and operated a four-branch F&B chain; standardized supply, inventory, service workflows, and lean cost control.
- Managed teams, service quality, store operations, and supply processes.

2017 - 2019 Rewards Manager & Flight Crew - The Grand Ho Tram & VietJet Air

- Served premium customers, managed loyalty accounts, and handled service situations according to hospitality and aviation standards.
- Developed operational discipline, professional communication, adaptability, and execution under pressure.

Education & Learning Platforms

Products supporting center management, parent engagement, digital learning, and teacher recruitment.

IVS CenterCare Live • URL: center.ivslearning.io.vn • Manages students, classes, schedules, attendance, tuition, payroll, and operational reports. • Contribution: workflow mapping, data fields, role logic, dashboards, tuition/attendance/payroll logic, and training support.	LearningCare Live • URL: care.ivslearning.io.vn • Parent/student care portal covering learning progress, attendance, tuition, and learning interactions. • Contribution: user journeys, portal content architecture, notification/support workflows, and dashboard flows.
ELearners LMS Live • URL: lms.ivslearning.io.vn • K-12 learning platform for lessons, assignments, learning-path tracking, and performance assessment. • Contribution: learning workflows, content/report structures, progress tracking, and assessment/report flows.	Aivy TeacherMatch MVP • URL: ivslearning.top • Recruitment and matching platform connecting English teachers with schools/centers through verified profiles, job posts, location-based search, and in-app chat. • Contribution: two-sided marketplace workflow, teacher/center profiles, job posting, matching logic, and verification flow.
IVS Academy Live • URL: ivsacademy.edu.vn • Education services platform for English programs, school partnerships, international teacher supply, preschool partnerships, and digital learning operations. • Contribution: service positioning, partnership flows, education service architecture, and lead/inquiry structure.	

Software-as-a-Partner Model

IVS's technology approach: reduce partnership barriers with schools and centers by directly addressing internal management bottlenecks, data synchronization, operational support, and the foundation for expanding education partnerships.

Trust Infrastructure, Digital Commerce & Public Platforms

Project group supporting QR verification, marketplace operations, local portals, and digital service capability presentation.

ACFMart Platform In Development • URL: acfmart.vn / acfmart.store / acfmart.online / acfmart.cloud • Trust-first e-commerce marketplace: buyer portal, seller portal, affiliate/community portal, and admin portal. • Contribution: portal role definition, marketplace workflow, buyer/seller/admin mapping, and trust-commerce product structure.	QRVerified by IVS Pilot Version • URL: qr.acfmart.vn • QR verification for traceability, anti-counterfeit protection, activation control, and public verification. • Contribution: QR verification flow, scan logs, activation lifecycle, public verification UX, and dashboard requirements.
IVS Trust Platform In Development • Backend trust infrastructure • Seller KYC, QR lifecycle, compliance records, audit logs, and product traceability. • Contribution: business rules for KYC/QR lifecycle, compliance workflow, admin moderation, and traceability logic.	DongNaiCity Live • URL: dongnaicity.com.vn • Specialized real estate portal for Dong Nai: listings, local market content, and affiliate-based distribution. • Contribution: listing workflow, information architecture, user profiles, local data presentation, and service positioning.
IVS Service Hub Live • URL: ivstech.store • Service hub presenting IVS's technology, education, consulting, and digital transformation solutions. • Contribution: content architecture, service positioning, inquiry flow, and case study/blog/service structure.	

Additional AI & Productivity Tools

Aivy Architect, Auto-fill CV AI, Ledger2gether, and utility prototypes such as StaySmart, Vethoi, Moonflow, Nurseflow, and Luv Yoga are used to test ideas, workflows, and structured data models.

CenterCare - Transforming Center Operations into a Management Platform

A demonstration of BA/Product capability through the management of students, classes, tuition, attendance, and operational reporting.

Business Context	Education centers often face scattered student data, difficult class/schedule synchronization, limited real-time tuition tracking, and fragmented management reporting.
BA/Product Approach	Mapped the core workflow from registration, class assignment, scheduling, attendance, tuition, suspension/cancelled sessions, and reporting. Defined roles/permissions, data fields, statuses, and acceptance criteria.
Solution Components	Student profiles, class management, scheduling, digital attendance, tuition/debt tracking, teacher payroll calculation, operational dashboards, and parent synchronization through LearningCare.
Delivered Value	Directly relevant to enterprise management software: process discovery, workflow design, translation of stakeholder needs into specifications, SIT/UAT support, and technical implementation coordination.

Role & Permission • Admin • Teacher • Student/Parent • Operation	Core Workflow • Registration • Class/Schedule • Attendance • Tuition/Payroll	Dashboard Need • Debt/overdue • Remaining sessions • Teacher payroll • Operational report
Data Field • Student profile • Class session • Payment record • Attendance status	Acceptance Criteria • Clear status • No double counting • Conflict prevention • Export/report consistency	Handover • User guide • Training • Feedback capture • Change request

ACFMart - QRVerified - IVS Trust Platform

A group of digital trust solutions supporting marketplace operations, product verification, and seller onboarding control.

Market Problem • Buyer trust is affected by counterfeit goods, unclear origin, and the lack of a public verification mechanism. • Sellers need onboarding controls, compliance profiles, and product verification tools. • A marketplace needs clearly separated buyer, seller, affiliate/community, and admin roles to operate transparently.			BA/Product Role • Designed buyer/seller/admin flows and portal roles for ACFMart. • Defined the QR lifecycle: code generation, printing, activation, public verification, scan logs, and audit trails. • Mapped seller KYC, moderation, compliance traceability, dashboards, and reporting requirements.	
KYC Seller • Seller verification	Product/SKU • Product structure	QR Lifecycle • Print - activate - verify	Public Verify • Buyer scans QR code	Audit/Admin • Logs - dashboard - control

Related Product Structure

ACFMart Platform	Buyer, Seller, Admin, Affiliate/Community	Design trusted transaction flows, seller control, and growth direction through community/affiliate channels.
QRVerified by IVS	Public Verify, Scan Log, Activation	Public QR verification flow that improves transparency and supports traceability.
IVS Trust Platform	KYC, QR Lifecycle, Compliance, Audit	Backend trust infrastructure for seller verification, traceability, moderation, and reporting.

Leadership, Community & Partnership

Development Projects

Initiatives built through real implementation, team coordination, and stakeholder engagement.

TheGenZ iCon - Community Event

- Coordinated cross-functional teams for an education and community event for young people with more than 1,500 attendees.
- Focus: program design, partner coordination, on-site operations, and student experience.

IELTS Station - Project

Implementation Leadership

- Developed the project from market research and business model design to facility setup, academic coordination, operations, and launch preparation.
- Focus: market research, education, operations, and launch execution.

Education Partnership Development

- Supported connections with schools and education organizations through programs, events, communication plans, and stakeholder engagement.
- Focus: schools, education, partners, and stakeholders.

Travel Partnership Development

- Built and maintained a network of more than 200 travel/restaurant partners.
- Supported service capacity for approximately 15,000 guests during the peak season.

Capabilities Demonstrated Through Leadership Projects

Planning, dependency management, people coordination, implementation quality control, stakeholder communication, and timeline discipline in real operational contexts.

Education, Certifications & Role Fit

A multidisciplinary academic foundation connecting business, language, service operations, and technology.

Education & Certifications

- Bachelor of English Studies - Vietnam Aviation Academy (2012 - 2016), Good classification.
- Bachelor of Business Administration - Vietnam Aviation Academy (2013 - 2017), Fairly Good classification.
- Certificate in Education Management - Ho Chi Minh City Institute of Education Management (2024).
- Intermediate Diploma in Aviation Commercial Services - Vietnam Aviation Academy (2013 - 2015).
- LinkedIn Learning, Alibaba Cloud, Microsoft Learn: cloud-native services, Azure, security, identity, AI workflow automation.

Suitable Work Environment

- Business Analyst / Product BA / Product Owner roles for management systems, CRM/LMS, portals, marketplaces, or internal SaaS products.
- Environments that need someone who understands business operations, can work with technical teams, and can coordinate stakeholders.
- Preferred areas include EdTech, enterprise digital transformation, service operations, education platforms, trust commerce, and AI workflows.
- Available for roles in Ho Chi Minh City, Dong Nai, or project-based travel; able to work with international partners in English.
